

# Built-in Sensors Policy

**Effective:** 04/07/2025.

**Developer:** László Kővári (laszlo.kovary@gmail.com)

---

## 1. App Overview

This Android application ("the App") is designed to display information about **built-in sensors** available on your device. Users can:

- View the list of available sensors.
  - Select a sensor to see its real-time data (e.g., accelerometer, gyroscope).
  - Optionally save the list of available sensors to a local text file on the device.
- 

## 2. Data Collection and Usage

We respect your privacy.

- ✓ **No personal or sensitive data is collected, stored, transmitted, or shared.**
- ✓ The App does **not** access user identity, contacts, location, messages, or media files.
- ✓ The App does **not** require an internet connection and has **no backend servers** or APIs.

The sensor data is only shown **on screen** and optionally saved **locally** on the device **by the user's action**. This data is not accessible to the developer or third parties.

---

## 3. Permissions Used

To provide core features, the app may request the following Android permissions:

- **BODY\_SENSORS** – To access hardware sensors such as heart rate (if available).
- **WRITE\_EXTERNAL\_STORAGE** (on older Android versions) – To save the sensor list file locally, if the user chooses to do so.

These permissions are used **solely for local functionality** and **never** to transmit or collect any data.

---

#### 4. Age Restriction

This app is intended for users **aged 15 and above**.

It is educational and technical in nature and does not include content unsuitable for younger audiences.

---

#### 5. Security

As the App does not collect or transmit any data, there is no risk of data breaches or leaks.

All files created (e.g., saved sensor list) are stored **only on the device**, and you can delete them at any time.

---

#### 6. Changes to This Policy

If the app is updated in the future to include any new features that require data collection, this policy will be updated accordingly. Users will be notified via the app's update log and this page.

---

#### 7. Contact

If you have any questions about this Privacy Policy or the App:
